

### The DTC test track

An essential part of the services in the area of **Active Safety** of the DTC Dynamic Test Center AG consists of measurements during road tests, which can be carried out on our new test track.

The test track (800 m) is divided in three main areas:

- Vehicle dynamics area            50 m x 50 m    (yellow)
- Noise and brake area            30 m x 200 m   (red)
- Acceleration area                4 m x 500 m    (blue)

The test track can be rented for training courses, driver trainings or unit tests. Feel free to contact us for more information!

### YOUR ADVANTAGES

#### High Availability

Our own test track allows the best possible availability. This allows us to respond more flexibly to your deadlines.

#### Optimized ISO road surface

The road surface in the area of noise measurements achieves the last requirements according to DIN ISO 10844, so the measurements can be performed under ideal conditions.

#### Reduced task period

Processes can be simplified and the task period can be shortened considerably due to the proximity to the premises of DTC AG.
